

## **Biodex Echo Pro™ Echocardiography Table**

The Echo Pro has been re-engineered with the sonographer in mind. The new ergonomic design provides a barrier-free imaging experience. The result is less sonographer injury and better quality images.

Redesigned features make it easier for the sonographer to access the patient from all sides. The new cardiac scanning cushion now drops down and releases from either side of the table with nothing protruding. The sonographer has open access to the left thorax area for an unobstructed apical approach. New side rails are flush to the table and fold completely beneath the table out of the sonographer's way, eliminating potential obstruction.

Patient comfort is assured even during lengthy procedures with our new softer feel, Naugahyde® antimicrobial mattress cover, which also provides protection against bacteria.

Add options such as an Articulating Scanning Arm Board or Headrest Extension for easier thyroid and carotid access to configure the Echo Pro to fit your department needs.
